

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-20-3425	
Item	Question	Authors' Response (place “-” if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data for principal component analysis (PCA) will be shared, and the method using PCA method to evaluate the four common biomarkers in predict blood culture results and the mortality in culture positive patients has seldom been provided in previous studies.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	One years within the publication date, since the the method may be more used over time
7	To whom will you share the data?	Scholars, clinicians who are interested in this kind of research
8	For what type of analysis or purpose?	For analysis to evaluate whether cheap and quickly available infection biomarkers are helpful in assisting judgement of blood culture results and patient prognosis.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: zhangsheng870801@hotmail.com.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
