

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-20-1432	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	
3	What data in particular will be shared?	The morphological data in particular will be shared, because we found a significant correlation between morphological variables of initial defect morphology of alveolar ridge with GBR outcomes, which has seldom been provided in previous studies.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan, informed consent form, and clinical study report will also be shared if requested.
5	When will data availability begin?	From the publication date
6	When will data availability end?	Two years within the publication date since the technique or survival date may be updated over time.
7	To whom will you share the data?	Dental surgeons who are interested in studies of GBR.
8	For what type of analysis or purpose?	For analysis to explore the influence of initial defect morphology of alveolar ridge on volumetric change of grafted bone following guided bone regeneration in anterior maxilla region.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: Sjy0511@hotmail.com
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
