

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/atm-20-2117	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	The data of genetic variants in the peroxisome pathway genes as independent survival predictors and two independent SNPs and mRNA expression levels of the associated genes in particular will be shared.
4	Any other documents will be share? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	Statistical analysis plan will also be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Two years within the publication date, since the technique or survival date may be updated over time.
7	To whom will you share the data?	Medical oncologists who are interested in studies of cutaneous melanoma.
8	For what type of analysis or purpose?	For analysis to evaluate the genetic variants and cutaneous melanoma-specific survival.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: qingyi.wei@duke.edu.
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
